INSTALLATION INSTRUCTIONS

For item#3846-66A (New. 8/03/2020)

READ AND SAVE THESE INSTRUCTIONS

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.

PREPARING FOR INSTALLATION (Fig. 1)

1. Shut off power at the fuse box or circuit breaker box and remove the old fixture including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts in a clean area. Take care not to misplace any small parts necessary for installation.
3. Screw rod (J) onto the all thread (I) on the fixture body and slide coupling (N) over the all thread of rod (J).
4. Determine the desired hanging height and thread rods (F1, F2 and F3) to rod (J). Screw loop (H1) to rod (F1). Pass the wires carefully through each rod as you assemble.
5. Attach the quick link (G) to loop (H1) and loop (H2) on the canopy (E). Carefully feed the wire through loop (H1), quick link (G) and loop (H2).
6. Position the mounting plate (C) on the ceiling and mark location of the two mounting holes. Drill the appropriate size holes on the ceiling and insert the plastic anchors (A).
7. Attach the mounting plate (C) to the junction box, not included, using mounting screws (B) (Size: #8-32N*L0.5”). The side of the mounting plate marked “GND” must face out.
8. Secure the mounting plate (C) by inserting the wood screws (D) through the holes on the mounting plate into the plastic anchors (A).

CONNECTING THE WIRES (Fig. 2)

9. Connect the electrical wires as shown in figure 2, making sure that all wire connectors are secured. If your junction box has a ground wire (green or bare copper), connect the fixture’s ground wire to it. Otherwise, connect the fixture’s ground wire directly to the mounting plate (C) using the green screw provided.
10. Tuck the wire connectors neatly into the junction box and raise the canopy to the ceiling.

COMPLETING THE INSTALLATION (Fig. 1)

11. Place canopy (E) over the mounting plate (C) and secure it with screws (F).
12. Place the support ring (S) over the socket (R).
13. Install (6) six candelabra base bulbs (O) up to 60 watts each or CFL or LED equivalent (not included) in accordance with the fixture specification**—DO NOT EXCEED THE MAXIMUM WATTAGE RATING! (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!).**
14. Tear off the EVA protective film on the inside of the support ring (P) and slide glass shade (Q) onto support ring (P). Slightly press to secure.
15. Screw the long rods (L) onto the all thread (I) on the fixture body (Q).
16. Screw the short rods (M) on the fixture body (Q).

Your installation is now complete. Return power to the outlet box and test the fixture.

Note: Illustration (Fig. 1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.
