

INSTALLATION INSTRUCTION FOR FIXTURE #4069-572

**WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.
AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.**

ASSEMBLY THE FIXTURE (FIG. 1)

1. Shut off the power at the fuse box or circuit breaker. If necessary, remove the existing fixture and its mounting hardware from the ceiling.
2. Carefully unpack your new fixture and lay out all the parts in a clear area. Take care not to lose any small parts necessary for installation.
3. Adjust the fixture arms to its desired position.
4. Determine the rod length if necessary, then lace the fixture wires through the rods (A) & (N) and small loop (F) and canopy (G) in order. After that, assemble the rods (N) & (A) together, then assemble the bottom end of rod (A) into the coupling (D) and the small loop (F) into the top end of the rod (N) tightly.
5. Attach the cross bar (M) to the outlet box using the outlet box screws (K). The side of the mounting bar marked "GND" must face out.
6. Follow the wiring instructions carefully (See Fig.2).
7. Attach the fixture main body onto outlet box by protruding mounting screws (L) through mounting holes on the canopy (G) and secure with ball nut (J).
8. Install the bulb (included) onto the socket (C) in accordance with the fixture's specifications. **(DO NOT EXCEED THE MAXIMUM WATTAGE RATING!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!).**

CONNECTING THE WIRES (FIG. 2)

9. Connect the electrical wires as follows. Connect the smooth wire from the fixture to the smooth (HOT) house wire. Connect the ribbed wire from the fixture to the ribbed (Neutral) house wire. Make sure all the wire nuts were secured. You may wrap the connections with electrical tape. If your outlet box has a ground wire (Green or Bare Copper) connect fixture's ground wire to it. Other wise attach the bare copper fixture wire to the green ground screw on the mounting bar.
10. Tuck the wire connections neatly into the ceiling junction box.

Your installation is now complete. Turn on the power supply of the junction box to test the fixture.
