

INSTALLATION INSTRUCTIONS FOR P5216-L

For LED Wall Mount Fixture

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.
AVERTISSEMENT ! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DODISJONCTEUR.

PREPARATION

1. Shut off power at the fuse box or circuit breaker box. If necessary, remove the old fixture and mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
3. Position mounting plate (D) on the wall, and mark the location of the two drywall anchors (C). Pre-drill the holes for the drywall anchors (C). Then insert the drywall anchors (C) into the wall.
4. Attach the mounting plate (D) to the junction box with mounting screws (A) (Size: 8-32*1/2"L). The side of the mounting plate marked "GND" must face out.
5. Place the wood screws (E) through the holes of the mounting plate (D) and into the drywall anchors (C) to secure the mounting plate (D) to the wall.

CONNECTING THE WIRES

6. Connect the electrical wires as shown in Fig.2, making sure that all wire nuts are secured. If your outlet has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the mounting plate (D) using the green screw (B) provided. Tuck the wire connections neatly into the junction box.

FINISHING THE INSTALLATION (FIG. 1)

7. Align screw (H) and plastic gasket (I) to the glass (J) and secure into hook (L).
8. Align hook (L) with glass (J) to fixture (G) and secure with screws (K).
9. Align fixture (G) onto mounting plate (D) and secure with screws (F).

CAUTION /ATTENTION: When handling the fixture, do not apply pressure to the LEDs. Hold the fixture by the base or back plate (E) only.

Replacing LED module (Fig. 3)

The LED module can be replaced by a qualified electrician without cutting of wire and without damage to any decorative element to which the fixture is attached. See installation steps for more details (Fig. 3)

Warning: Turn off power at the circuit breaker before replacing LED module or LED driver.

- a. To remove the fixture from the wall: loosen screws (F), and remove the wire connectors. Then place the fixture on a clear flat surface. (Fig. 1)
- b. Remove screws (K) to remove glass (J) from the fixture (G).
- c. Remove screws (M) and plastic gasket (N) and carefully remove the LED module (O) from fixture (G).
- d. Reverse steps a-c for installing the new LED module.

Note: The LED module should be provided by a specified supplier.

IMPORTANT: Fixture should be installed by a qualified electrician to ensure proper wiring and installation.

Dimmable with ELV and/or LED compatible wall dimmer switches.
