

INSTALLATION INSTRUCTIONS

For MODEL#P6105/P6106/P6107/P6107A/P6107B/P6108/P6108A/P6108B/P6109/P6109A/P6109B(12/14/2022)

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

FOR HOUSEHOLD USE ONLY, SAVE THESE INSTRUCTIONS

WARNING: To avoid the risk of electric shock, be sure to turn off main power prior to install mirror light or maintenance. Please read the Installation Manual thoroughly.

Clean mirror light periodically to help maintain its new appearance over the years. Use only a soft brush or lint free cloth to avoid scratching the finish. Note: Never use water when cleaning, this probably cause electric shock.

HANGING THE MIRROR LIGHT

1. Carefully unpack your new mirror and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
2. Use the aluminum holder (H) as the template near the outlet box, mark the hole positions accordingly. Use the level (G) to ensure aluminum holder is leveled. Then drill two holes on wall and insert anchors (B).
3. Secure aluminum holder (H) to wall with two screws (A) into the two anchors (B). Before tightening, screws use level (G) to do the proper horizontal adjustments. (Fig. 1).
4. Carefully hold mirror, pass electrical wires through the mounting plate (E) and washer (D). Connect the electrical wires as shown in (Fig.2). Making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect mirror's ground wire to it. If your outlet box doesn't have a ground wire, consult your electrician for proper grounding. Carefully tuck all wires into outlet box (Not included) and cover it with mounting plate (E) and secure with 2 mounting screws (F).
5. Carefully hang mirror over the aluminum holder (H) on the wall.
6. Remove the protected plastic sleeve on mirror surface. Now, the mirror installation is completed.
7. Turn on electric power from circuit breaker or switch box, then the mirror touch button will appear blue color as it's in standby mode automatically.
