

# INSTALLATION INSTRUCTIONS FOR P8154-670-L

## For LED Pendant

READ AND SAVE THESE INSTRUCTIONS

**WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER**  
**AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DO DISJONCTEU**

### ASSEMBLING THE FIXTURE (Fig.1)

- 1 Shut off power at the fuse box or circuit breaker. Remove the old fixture including the mounting hardware.
- 2 Carefully remove the fixture from the carton and check that all parts are included as show in Figure 1. Unscrew ( G ) to remove the mounting plate ( A ) from the canopy ( F ), unscrew hex nut to take the square plate off.
- 3 Position mounting plate(A) on the ceiling ,and mark the location of the dry wall anchors(W).Pre-drill the holes for the dry wall anchors ,Insert the dry wall anchors(W) into the ceiling ,Attach the mounting plate (A) to the junction box using the mounting screws(B,size 8#-32N 1/2").The side of the mounting plate marked "GND" must face out.Place the wood screw (T) through the slot hole into the dry wall anchor(W) to secure the mounting plate (A)
- 4 The support cable(E) is provided to support the weight of the fixture while wiring .Align the fixture to mounting plate(A) and attach quick link (U) on the end of support cable (E) into the hook hole on the mounting plate(A). Carefully allow the support cable(E) to support the weight of the fixture while wiring.

### CONNECTING THE WIRES (Fig. 2)

- 5 Pass the black/white and bare copper wires from the hole of the square plate (V), and let the square plate rest on the canopy (F).Connect the electrical wire as shown in figure 2, making sure that all wire connectors are secured. If your junction box has a ground wire (green or bare copper), connect the ground wire from the fixture to it. Otherwise connect fixture ground wire (C) directly to the mounting plate using the green screw (D)provided. Tuck the wire connections neatly into the ceiling junction box as you hold the canopy towards the ceiling.

### FINISHING THE INSTALLATION (Fig.1)

- 6 Rise the square plate (V) to the studs to fix with the hex nuts. Fix the canopy(F) into the mounting plate (A) with finial(G). Adjust the length of the cable to pull or push until the desired length by pushing down the spring nut (S)

Your installation is now complete. Return power to the junction box and test the fixture.

**CAUTION/ATTENTION:** When handling the fixture,do not apply pressure to the LEDs. Hold the fixture by the frame only.

**IMPORTANT:** Fixture should be installed by a qualified electrician to ensure proper wiring and installation. Dimmable with ELV dimmer switches. Recommend model# SELV-300P Skylark.

### LED module replace(Fig.3)

#### Shut off power before replacing

- 1: There have four LED modules with this fixture ,in each up and down of the Body Ring (H and J ),if each side of the LED module do not work ,it is need to change the complete body ring from the canopy ,make sure the power is off before you replace ;
- 2: Twist-off the finial (G) and disconnect the wires and save the wire nuts , take the fixture down from the ceiling carefully;
- 3: Disconnect the wire nut (K), cut a short section of cable wire if necessary , be careful not to damage the other insulation jacket of the inner wire when stripping bare strands of 1/2".
- 4: Remove the "8" buckle and take off the cable wire from the hole of the canopy (F). Unscrew the set screw (M) with the wrench provided. Save these parts for subsequent service.
- 5: Push the spring nut with finger to pull out the 4 metal cables.
- 6: Replace the complete fixture body (H or J) with a new one.
- 7: Repeat step 5-1 to assemble the fixture .

Your replace is now complete , Re-install the fixture to the ceiling as shown in Fig. 1, return power to the junction box and test the fixture
